

VIRTUAL INTERVIEWING AT YOUR FINGERTIPS

PeopleScout's Affinix software quickly enables you and your team to interview candidates virtually from home.

Affinix is reliable, easy to use and fast to set-up. With a range of interview styles, your candidates can be interviewed live or pre-recorded, and can be organised as a 1-1 or a panel. Our software is mobile optimised, includes functionality for self-scheduling calls and is fully GDPR compliant. We also have plenty of immediately available capacity to support clients (existing and new) to adapt to remote work challenges. We are able to set-up, accept, screen and score your candidate's interviews using our trained recruitment coordinators. To find out more, speak to your client manager or call Rowena Bach on 07929 519215.
